

Art & Design Curriculum

Intent

At Iqra Primary school, we believe that high-quality Art and design lessons will provide a visual, tactile and sensory experience of understanding and responding to the world. Our Art curriculum provides children with opportunities to develop their skills using a range of media and materials. Children learn the skills of drawing, painting, printing, collage, textiles, 3D work and digital art and are given the opportunity to explore and evaluate different creative ideas. Children will be introduced to a range of works and develop knowledge of the styles and vocabulary used by famous artists.

The skills they acquire are applied to their cross-curricular topics, allowing children to use their art skills to reflect on and explore topics in greater depth; for example, by sketching historical artefacts in detail, researching geographical locations to support their work on landscape painting or using art as a medium to express emotion and thought to enhance their personal, social and emotional development. Many areas of art link with mathematical ideas of shape and space; for example, when printing repeating patterns and designs and thinking about 3D shapes to support structures. It is paramount that art work be purposeful; be this as a means of expression or to explore the styles of other artists that inspire our own work. Pupils should be clear what the intended outcomes are and have a means to measure their own work against this.

The aims of teaching art and design in our school are:

- To engage, inspire and challenge pupils, equipping them with the knowledge and skills to experiment, invent and create their own works of art, craft and design.
- As pupils progress through school, they should begin to think critically and develop a more rigorous understanding of art and design. They should also know how art and design both reflect and shape our history, and contribute to the culture, creativity and wealth of our nation.
- To produce creative work, exploring their ideas and recording their experiences.
- To become proficient in drawing, painting, sculpture and other art, craft and design techniques
- To evaluate and analyse creative works using the language of art, craft and design.
- To know about great artists, craft makers and designers, and understand the historical and cultural development of their art forms.

Implementation

To ensure high standards of teaching and learning in art and design, we implement a curriculum that is progressive throughout the whole school. Art and design is taught as part of a half-termly or termly topic, focusing on knowledge and skills stated in the National Curriculum. A cycle of lessons for each subject are carefully planned for progression and depth.

In Art, children are expected to be reflective and evaluate their work, thinking about how they can make changes and keep improving. This should be meaningful and continuous throughout the process, with evidence of age-related verbal and written reflection. Children are encouraged to take risks and experiment and then reflect on why some ideas and techniques are successful or not for a particular project.

Impact

Our Art Curriculum is high quality, well thought out and is planned to demonstrate progression. If children are keeping up with the curriculum, they are deemed to be making good or better progress. In addition, we measure the impact of our curriculum through the following methods:

- Assessing children's understanding of topic linked vocabulary before and after the unit is taught.
- Summative assessment of pupil discussions about their learning.
- Images and videos of the children's practical learning.
- A celebration of learning for each term which demonstrates progression across the school;
- Pupil discussions about their learning; which includes discussion of their thoughts, ideas, processing and evaluations of work.
